FIFTH CENSUS OF CANADA, 1911.

AREAS AND POPULATION BY PROVINCES, DISTRICTS AND SUBDISTRICTS.

To the Honourable George Eulas Foster,

Minister of Trade and Commerce.

Sir,—I have the honour to submit herewith for presentation to Parliament the first volume of the Report on the Fifth Census of Canada.[1]

This volume contains statistics of the population of the Dominion enumerated under date of the first day of June 1911, for provinces, territories, districts and subdistricts, together with comparative populations for the Fourth Census taken in 1901. The Subdistricts ordinarily consist of townships, parishes, cities, towns and incorporated villages, and the population is therefore readily classified as rural and urban.

The field work of the Census was entrusted to 264 commissioners and 9,703 enumerators, who were required under instructions issued by the Minister of Agriculture to finish the enumeration and forward the schedules for their several areas to the Census Office at or before the end of the month of June, or within a time fixed by the special instructions to each commissioner.

Every enumerator, the instructions provided, was directed to begin his work on Thursday, the first day of June, and to continue day by day except Sundays until the canvass of his area was finished.

The following statement shows the number of reports received at the Census Office by monthly periods beginning with June, together with their per cent of the total number of enumerators to the close of the work, viz.:

[1] Table I of this Report was issued as a Special Report under date of 27th February 1912, subject to revision.

	Number.	Per cent. of total.
Reports received in June	2,661	27·430
" " July	5,854	60·344
" " August	873	8·999
" " September	96	·989
" " October	102	1·052
" " November	62	·640
" " December	46	·474
Reports received to February 26	9	·072
Total reports received	9,703	100·000

The number received to the end of August was 9,388, which is 96·773 per cent of the whole, and the number from the first of September to the 26th of February was 313 or 3·227 per cent. The reports received for the several provinces from first to last are shown in the next table for the successive months, viz.:

Provinces.	June.	July.	Aug.	Sept.	Oct.	Nov.	Dec.	Feb. 26.	Totals.
Alberta	26	389	103	9	1	1	–	–	520
British Columbia	–	175	148	16	1	8	8	1	357

Yukon	–	–	–	–	–	–	32	–	32
N. W. Territories	–	3	7	7	44	17	1	2	81
Totals	2,661	5,854	873	96	102	62	46	9	9,703

Compared with this table there were at the Census of 1891 4,304 enumerators, of whom 3,644 made their reports within three months and 660 within thirteen months; and at the census of 1901 8,847 enumerators, of whom 7,234 made their reports within three months and 1,613 within the next eight months. The whole population of the unorganized territories in 1891 (32,168) was an estimate; and in 1901 25,490 of the same t erritories out of a total of 52,709 were estimated. The census of 1911 is an enumeration by person and name for all parts of the Dominion. The average number of persons recorded per enumerator in 1891, with nine schedules and 216 questions, was 1,110; in 1901 with eleven schedules and 561 questions, was 604; and in 1911, with thirteen schedules and 549 questions, was 742.

The tables of the schedule of populatlon have been compiled by hand work. The first shows the area of subdistricts, the population classed as male and female,

and the population per square mile, as well as rural and urban, and compared with these figures is the population by the census of 1901. The second and third tables show the population by conjugal conditions, and the remaining twelve comparative tables have been prepared from the five censuses since Confederation —taken in the several decades 1871–1911.

Comparing the census years of 1911 and 1901, the population of Canada is shown by provinces and territories in the following table, together with the increase in the period of ten years and the increase per cent, viz.:—

Provinces.	1911.	1901.	Increase.	Increase p.c.
Alberta	374,663	73,022	301,641	413·08
British Columbia	392,480	178,657	213,823	119·68
Manitoba	455,614	255,211	200,403	78·52
New Brunswick	351,889	331,120	20,769	6·27
Nova Scotia	492,338	459,574	32,764	7·13

[1]Decrease.

The rural population in 1911 was 3,924,394 and the urban population 3,280,444. In 1901 the rural population was 3,349,516 and the urban population 2,021,799. The increase of rural population in the ten years is therefore 574,878 and of the urban 1,258,645, which is 17·16 per cent for the former and 62·25 per cent for the latter. In Alberta the increase of rural population in the ten years was 180,327 and of urban 121,314. In British Columbia the increase of rural population was 100,318 and of urban 113,505, and in Manitoba the rural increase was 70,511 and the urban 129,892. New Brunswick lost 1,493 rural and gained 22,262 urban, while Nova Scotia lost 23,981 rural and gained 56,745 urban. Ontario lost 52,184 rural and gained 392,511 urban. Prince Edward Island gained 15 urban, but lost 9,546 rural. Quebec shows gains of both rural and urban population, being 39,951 for the former and 313,863 for the latter. Saskatchewan also shows gains in both classes, being 287,338 for the former and 113,815 for the latter. In Yukon the rural loss was 13,430 and the urban loss 5,277. In the Northwest Territories, whose population is wholly rural, the loss was 2,933. For electoral districts showing losses of urban population in the decade, classified by provinces, see table IX, pp. 527-30. A summary of table I, giving the areas and population by districts for 1911 and the population for 1901 is given in table VIII, pp. 523-26.

Table XIV gives the population of cities and towns in Canada with a population in 1911 of 4,000 persons and over, and their several populations are given for the successive census years 1871–1911. There were 107 such cities in 1911, 74 in 1901, 55 in 1891, 43 in 1881 and 28 in 1871. There was

one in 1871 with 100,000 and over, one in 1881, two in 1891, two in 1901, and four in 1911. There were two with 200,000 and over in 1901 and 1911, two with 300,000 and over in 1911 and one with 400,000 and over in 1911. The largest gain in the period of forty years was made by Montreal, being 355,480; the second largest by Toronto, being 317,538; the third largest by Winnipeg, being 135,794. Vancouver's growth was 100,401 in less than thirty years. Table XIII gives the population of all cities, towns and incorporated villages in Canada in 1911.

From the first census of the Dominion in 1871 to the fifth in 1911, a period of forty years, the population increased from 3,689,257 to 7,204,838 or nearly one hundred per cent. In Ontario during the same period the increase was 902,423, of Quebec 811,196, of Manitoba 430,386 and of British Columbia 356,233. Alberta and Saskatchewan, organized in 1905, show for the former an increase from 1901 of 301,641 and for the latter of 401,153. Nova Scotia made an increase of 104,538 in forty years, and New Brunswick an increase of 66,295. Prince Edward Island's population in the same period fell off by 293, and the decrease in the Northwest Territories is accounted for by the fact that Alberta and Saskatchewan have been organized out of the Territories.

The rate of increase in the population of the Dominion during the forty years 1871 to 1911 was 95·29 p.c., of British Columbia 982·79 p.c., of Manitoba 1,705·99 p.c., of New Brunswick 23·21 p.c., of Nova Scotia 26·96 p.c., of Ontario 55·67 p.c., of Prince Edward Island —0·31 p.c., and of Quebec 68·08 p.c. Prince Edward Island's maximum was attained in the third decade, having grown from 94,021 in 1871 to 109,078 in 1881.

The conjugal condition of the people is given in table II by districts and subdistricts for the whole of Canada. It shows the population classified by sex and conjugal condition for 1911, and the following comparative table gives the figures for the five decennial periods 1871–1911.

Classes	Sex	1871	1881	1891	1901	1911
Sex	Male	1,764,311	2,188,854	2,460,471	2,751,708	3,821,067
	Female	1,721,450	2,135,956	2,372,768	2,619,607	3,383,771
	Total	3,485,761	4,324,810	4,833,239	5,371,315	7,204,838

	Female	1,099,216	1,336,982	1,451,851	1,564,011	1,941,354
	Total	2,283,003	2,784,396	3,053,392	3,312,593	4,310,514
Married	Male	543,037	690,544	796,153	928,952	1,331,564
	Female	542,339	689,540	791,902	904,091	1,251,182
	Total	1,085,376	1,380,084	1,588,055	1,833,043	2,582,746
Widowed	Male	37,487	50,895	62,777	73,837	89,121
	Female	79,895	109,435	129,015	151,181	179,598
	Total	117,382	160,330	191,792	225,018	268,719
Divorced	Male	–	–	–	337	839
	Female	–	–	–	324	691
	Total	–	–	–	661	1,530

NOTE In this table the population of Canada for 1871 does not include Manitoba, British Columbia, Prince Edward Island nor the Northwest Territories, which were not included in the Dominion Census of that year.

For the Census of 1901 the class of divorced persons was added and for the Census of 1911 the class of the legally separated. In 1901 there were 661 divorced and in 1911 there were 1,530. In 1911 the legally separated numbered 1,286 males and 1,584 females. There were also 29,097 males and 9,362 females not given. There were persons of the three classes in the country previous to 1911, but they were included with the single, married and divorced at proportional rates. The bulk of the "not given" class in the case of men was employed on railway construction and in mines, where it was difficult for the enumerators to get personal access to them or to procure information of them excepting from employers or the men in charge of their boarding or lodging places, and a like remark applies in the case of women who were not found at their homes.

Comparing the four first classes by percentages of population in 1871 and 1911, males increased during the forty years by 2,056,756, and females by 1,662,321; single males by 1,185,373 and single females by 842,138; married males by 788,527 and married females by 708,843; widowed males by 51,634 and widowed females by 99,703. Compared in another way, males were 50·61 per cent of the population in 1871 and females 49·39, and in 1911 males were 53·03 and females 46·97. Single males in 1871 were 33·96 and females 31·53 per cent of the population; and in 1911 single males were 32·88 and females 26·94. Married males in 1871 were 15·58 per cent of the population and females the same, and in 1911 married males were 18·48 and married females 17·37 per cent. Widowers in 1871 were 1·07 and widows 2·29 per cent of the population, and in 1911 widowers were 1·24 and widows 2·49 per cent. The percentages of the other classes are scarcely appreciable, being only four-tenths of one per cent for the most numerous class in 1911.

The number of occupied dwellings in the subdistricts of the Dominion in 1911 was 1,413,913 and the number of families 1,488,353, compared with 1,028,892 dwellings and 1,070,747 families in 1901. The average number of persons per dwelling in 1911 was 5·096 and per family 4·841, compared with averages of 5·220 per dwelling and 5·016 per family in 1901.

The area of Canada is given in the census tables of 1911 as 3,729,665 square miles of land and water, which is 15,909 square miles less than ten years ago. This is due in part to a reduction following the Alaska Boundary treaty, and also to new map measurements. The population per square mile was 1·93 in 1911, and in 1901 computed on the same area it was 1·44. In Alberta the population was 1·47 per square mile in 1911 and in 1901 it was ·28. British Columbia in 1911 had 1·09 per square mile, and in 1901 only ·50. Manitoba in 1901 had 3·46 per square mile, and in 1911 it reached 6·18. New Brunswick increased during the same period from 11·83 to 12·61 per square mile, and Nova Scotia from 21·45 to 22·98. Ontario's increase was nearly 1·30 per square mile, or from 8·37 in 1901 to 9·67 in 1911. Prince Edward Island in 1901 had a population of 47·27 and in 1911 it fell to 42·91. Quebec in the ten years has grown from 4·69 per square mile to 5·69, which is an increase of one per square mile as compared with 1·30 in Ontario. In Saskatchewan the increase has been from ·36 to 1·95, and in Yukon and the Northwest Territories there have been large decreases.

All other tables of population are in process of compilation mechanically, by what is called the card system, and already the records of 5,350,000 persons have been transferred from the original schedules to the cards. When this work is completed, which will be by the middle of the present year, the various tables of ages, origins, nativities, immigration, religions, occupations, literacy, language spoken, school attendance, wage earnings, etc., will be speedily assembled on electrical machines and made ready for the press.

Good progress has also been made with the schedules of agriculture and manufactures, and it is hoped that one if not both of these reports will be issued before the end of the fiscal year.

I have the honour to be, Sir,
Your obedient servant,

ARCHIBALD BLUE,
Chief Officer.

CINQUIÈME RECENSEMENT DU CANADA, 1911

SUPERFICIES ET POPULATION, PAR PROVINCES, DISTRICTS ET SOUS-DISTRICTS.

A L'Honorable George Eulas Foster,

Ministre du Commerce.

Monsieur,—J'ai l'honneur de vous soumettre ci-joint, pour être présenté au Parlement, le premier volume du Rapport sur le Cinquième Recensement du Canada.[1]

Ce volume contient les statistiques de la population du Dominion, dénombrée à la date du premier juin 1911, par provinces, territoires, districts et sous-districts, en comparaison avec la population relevée en 1901 par le quatrième Recensement. Les sous-districts comprennent ordinairement les municipalités, paroisses, cités, villes et villages incorporés: la population est donc ainsi toute classifiée en population rurale et population urbaine.

Le travail extérieur du Recensement a été confié à 264 Commissaires et à 9,703 énumérateurs ou recenseurs qui devaient, d'après les instructions du Ministre de l'Agriculture, terminer l'énumération et envoyer les listes concernant leurs régions respectives, au Bureau du Recensement à la fin ou avant la fin du mois de juin, ou d'une époque fixée par les instructions spéciales données à chaque commissaire.

Chaque énumérateur, suivant les instructions devait commencer son travail le jeudi 1er juin, et continuer jour par jour, les dimanches exceptés, jusqu'à ce que fut terminé le relevé de la région qui lui était dévolue.

Le tableau suivant indique le nombre des rapports reçus au Bureau du Recensement, par périodes mensuelles commençant avec juin, ainsi que la proportion pour cent de ces rapports comparativement au nombre total des énumérateurs, à la fin du travail:

[1]Le Tableau I de ce Rapport a été publié comme Rapport spécial sujet à revision, à la date du 27 février 1912.

Rapports reçus.	Nombre.	Pourcentage. du total.
Rapports reçus en juin	2,661	27·430

" " août	873	8·999
" " septembre	96	·989
" " octobre	102	1·052
" " novembre	62	·640
" " décembre	46	·474
" " jusqu'au 26 février	9	·072
Total des rapports reçus	9,703	100.000

Le nombre des rapports reçus à la fin d'août a été de 9,388, soit 96·773 pour cent de leur total, et le nombre de ceux qui ont été envoyés du premier septembre au 26 février a été de 313, ou 3·227 pour cent. Les rapports reçus des diverses provinces, du commencement à la fin des opérations, sont indiqués dans le tableau ci-après, suivant l'ordre des mois:

Provinces	Juin	Juillet	Août	Sept.	Octob.	Nov.	Déc.	26 Fév.	Totaux
Alberta	26	380	103	9	1	1	–	–	520
Colombie-Britannique	–	175	148	16	1	8	8	1	357
Manitoba	75	374	168	6	–	–	–	–	623
Nouveau-Brunswick	59	315	16	–	–	–	–	–	390

Québec	1,063	1,341	138	6	5	–	–	–	2,553
Saskatchewan	20	360	121	43	32	18	4	6	604
Yukon	–	–	–	–	–	–	32	–	32
Territoires du Nord-Ouest	–	3	7	7	44	17	1	2	81
Totaux	2,661	5,854	873	96	102	62	46	9	9,703

Comparativement à ce qui est indiqué dans ce tableau, il y avait, au Recensement de 1891, 4,304 énumérateurs, dont 3,644 firent leur rapport en moins de trois mois, et 660 en moins de treize mois; au recensement de 1901, il y avait 8,847 énumérateurs dont 7,234 firent leur rapport en moins de trois mois, et 1,613 dans les huit mois suivants. Toute la population des territoires non encore organisés, en 1891, fut simplement évaluée à 32,168; et en 1901, dans les mêmes territoires, l'évaluation ne porta que sur un nombre de 25,490 âmes. Le recensement de 1911 est une énumération personnelle et nominale, pour toutes les parties du Dominion. Le nombre moyen de personnes enregistrées par énumérateur, en 1891, avec neuf listes et 216 questions, fut de 1,110; en 1901, avec onze listes et 561 questions, il fut de 604; en 1911, avec treize listes et 549 questions, il fut de 742.

La compilation des tableaux de la liste de population a été exécutée à la main. La première donne la superficie des sous-districts, la population par

sexe, la population par mille carré, rurale et urbaine, ainsi que la population du recensement de 1901, comparée avec ces chiffres. Les deuxième et troisième tableaux donnent la population, au point de vue du mariage, et les douze derniers tableaux comparatifs ont été préparés d'après les cinq recensements exécutés depuis la confédération durant les décades écoulées de 1871 à 1911.

Le tableau suivant donne, en comparaison des recensements de 1911 et de 1901, la population du Canada, par provinces et territoires, ainsi que l'augmentation pour la période de 10 ans, et l'augmentation pour cent:

Provinces	1911	1901	Augmentation	Aug. p. cent.
Alberta	374,663	73,022	301,641	413·08
Colombie-Britannique	392,480	178,657	213,823	119·68

En 1911, la population rurale était de 3,924,394, et la population urbaine de 3,280,444; en 1901, la population rurale de 3,349,516, et la population urbaine, de 2,021,799. L'augmentation de la population rurale, dans les dix ans, a donc été de 574,878, et celle de la population urbaine, de 1,258,645, soit de 17·16 pour cent pour la première, et de 62·25 pour cent pour la dernière. Dans l'Alberta, l'augmentation, dans les dix dernières années, a été de 180,327, pour la population rurale, et de 121,314, pour la population urbaine. En Colombie-Britannique, l'augmentation de la population rurale a été de 100,318, et celle de la population urbaine, de 113,505; enfin, dans le Manitoba, l'augmentation de la population rurale a été de 70,511, et celle de la population urbaine, de 129,892. Le Nouveau-Brunswick a perdu 1,493 âmes en population rurale et en a gagné 22,262 en population urbaine, tandis que la Nouvelle-Ecosse a perdu 23,981 âmes en population rurale, et en a gagné 56,745 en population urbaine. Ontario a perdu 52,184 âmes en population rurale, et en a gagné 392,511 en population urbaine. L'Ile du Prince-Edouard a gagné 15 âmes en population urbaine, mais en a perdu 9,546 en population rurale. Québec a augmenté en population rurale et urbaine: de 39,951 âmes pour la première, et de 313,863, pour la dernière. Saskatchewan a également augmenté sa population des deux classes, de 287,338 âmes, pour la population rurale, et de 113,815 pour la population urbaine. Dans le Yukon, la perte rurale a été de 13,430, et la perte urbaine, de 5,277. Dans les Territoires du Nord-Ouest, dont la population est entièrement rurale, la perte a été de 2,933. Pour les districts électoraux accusant des pertes en

population urbaine durant la décade, voir Tableau IX, pages 527-30, où ces districts sont classifiés par provinces. Un résumé du Tableau I, donnant la superficie et la population par district, pour 1911, et la population pour 1901, est donné dans le Tableau VIII, pages 523-26.

Le tableau XIV donne la population des cités et villes du Canada ayant, en 1911, une population de 4,000 âmes et au-dessus, ainsi que leurs diverses populations pour les recensements précédents, à partir de 1871. En 1911, il y avait 107 cités et villes, 74 en 1901, 55 en 1891, 43 en 1881, et 28 en 1871. Il y avait une cité en 1871, ayant 100,000 âmes et plus, une en 1881, deux en 1901 et quatre en 1911. Il y avait deux cités ayant 200,000 âmes et au-delà, en 1901, dont l'une avait dépassé 400,000 et l'autre 300,000 âmes en 1911. Dans cette période de quarante ans, le plus grand progrès fut fait par Montréal, qui a gagné 355,480 âmes; vient ensuite Toronto, avec un gain de 317,538; puis Winnipeg, avec un gain de 135,794 habitants. L'augmentation de Vancouver, en moins de trente ans, a été de 100,401. Le tableau XIII donne la population de toutes les cités, villes et villages incorporés du Canada, en 1911.

Depuis le premier recensement du Dominion, en 1871, jusqu'au cinquième, en 1911, soit une période de quarante ans, la population a augmenté de 3,689,257 à 7,204,838, ou de près de cent pour cent. Dans Ontario, durant la même période, l'augmentation a été de 902,423, dans Québec, de 811,196, au Manitoba de 430,386, et dans la Colombie-Britannique, de 356,233. Alberta et Saskatchewan, érigées en provinces en 1905, accusent depuis 1901, la première, une augmentation de 301,641, et la seconde, de 401,153. La nouvelle-Ecosse a augmenté de 104,538 âmes en quarante ans, et le Nouveau-Brunswick, de 66,295. Durant la même période, la population de l'Ile du Prince-Edouard a baissé de 293, et la diminution constatée dans les Territoires du Nord-Ouest est attribuée au fait que l'Alberta et la Saskatchewan ont été distraites de ces Territoires.

Durant les 40 années de 1871 à 1911, le taux d'accroissement de la population du Dominion a été de 95·29 p.c.; celui de la Colombie-Britannique de 982·79 p.c.; celui de Manitoba de 1,705·99 p.c.; celui du Nouveau-Brunswick de 23·21 p.c.; celui de la Nouvelle-Ecosse de 26·96 p.c.; celui d'Ontario de 55·67 p.c.; celui de l'Ile du Prince-Edouard de—0·31 p.c.; et celui de Québec de 68·08 p.c. L'Ile du Prince-Edouard a atteint son maximum dans la troisième décade, ayant augmenté de 94,021 en 1871, à 109,078 en 1881.

L'état civil de la population est donné dans le Tableau II, par districts et sous-districts, pour tout le Canada. Ce tableau indique la population classifiée par sexe et par état matrimonial, pour 1911, tandis que le tableau comparatif ci-dessous donne les chiffres des cinq périodes décennales 1871–1911.

NOTA.—Dans ce tableau, la population du Canada pour 1871 ne comprend pas le Manitoba, la Colombie-Britannique, l'Ile du Prince-Edouard, ni les Territoires du Nord-Ouest, qui n'étaient pas compris dans le Recensement du Dominion de cette année.

Dans le recensement de 1901, on a ajouté la classe des personnes divorcées, et dans le recensement de 1911, celle des personnes légalement séparées, En 1901, il y avait 661 divorcés; en 1911, il y en avait 1,530. En 1911, les personnes séparées légalement étaient au nombre de 1,286 hommes et de 1,584 femmes. Il y avait aussi 29,097 hommes et 9,362 femmes dont l'état matrimonial n'était pas donné. Avant 1911, il y avait, dans le pays, des personnes des trois classes, mais elles étaient comprises avec les célibataires, les mariés et les divorcés, suivant des taux proportionnels. La majorité de la classe "état matrimonial non donné» comprenait, pour les hommes, des gens employés à la construction des chemins de fer, ou dans les mines, là où il était difficile pour les énumérateurs de les aborder personnellement, et d'en obtenir des renseignements, excepté par l'entremise de leurs patrons ou des personnes les logeant ou les pensionnant, et la même remarque s'applique aux femmes qu'on ne rencontrait pas chez elles.

Si l'on compare les quatre premières classes, au moyen des pourcentages de population, en 1871 et en 1911 on trouve que durant ces quarante années, les hommes ont augmenté de 2,056,756, et les femmes, de 1,662,321: les hommes célibataires, de 1,185,373, et les femmes célibataires, de 842,138; les hommes mariés, de 788,527, et les femmes mariées, de 708,843; les veufs, de 51,634, et les veuves, de 99,703. Suivant une autre comparaison, les hommes étaient 50·61 pour cent de la population, en 1871, et les femmes 49·39, tandis qu'en 1911, les hommes étaient 53·03, et les femmes 46·97 pour cent de la population. En 1871, les hommes célibataires étaient 33·96 p.c. et les femmes célibataires 31·53 p.c. de la population; tandis qu'en 1911, les hommes célibataires étaient 32·88 et les femmes célibataires 26·94 p.c. de la population. En 1871, les hommes mariés étaient 15·58 p.c. de la population, et de même pour les femmes

mariées, tandis qu'en 1911, les hommes mariés étaient 18·48, et les femmes mariées 17·37 p.c. de la population. En 1871, les veufs étaient de 1·07 et les veuves de 2·29 p. c. et en 1911 les veufs étaient 1·24, et les veuves, 2·49 p.c. Il est difficile d'évaluer les pourcentages des autres classes, car la plus nombreuse d'entre elles ne constituait, en 1911, que les quatre dixièmes de un pour cent de la population.

Le nombre de logements occupés dans les sous-districts du Dominion, en 1911, était de 1,413,913, et le nombre des familles était de 1,488,353, contre 1,028,892 logements et 1,070,747 familles, en 1901. En 1911 le nombre moyen de personnes par logement, était de 5·096, et par famille, de 4·841, contre, en moyenne, 5·220 par logement et 5·016 par famille, en 1901.

Les tableaux du recensement, de 1911, donnent la superficie du Canada comme étant de 3,729,665 milles carrés de terre et d'eau, ce qui est 15,909 milles de moins qu'il y a dix ans. Ceci est dû en partie à la réduction produite par le traité sur les frontières de l'Alaska, et aussi à de nouvelles mensurations géographiques. La population était de 1·93 par mille carré, en 1911; calculée sur la même base, elle était de 1·44, en 1901. En Alberta, la population était de 1·47 par mille carré, en 1911; elle était de ·28, en 1901. La Colombie-Britannique avait, en 1911, 1·09 habitant par mille carré; en 1901, elle n'en avait que ·50. Le Manitoba, en 1901 avait 3·46 habitants par mille carré; ce nombre s'est élevé à 6·18, en 1911. Le Nouveau-Brunswick, durant la même période, s'est accru de 11·83 à 12·61 habitants par mille carré, et la Nouvelle-Ecosse, de 21·45 à 22·98. L'augmentation, dans Ontario, a été de près de 1·30 par mille carré, soit de 8·37 en 1901 à 9·67 en 1911. L'Ile du Prince-Edouard qui, en 1901 avait une population de 47·27, est tombée à 42·91 en 1911. Québec, a augmenté, dans les 10 ans, de 4·69 à 5·69 habitants par mille carré, ce qui est une augmentation de un habitant par mille carré, contre 1·30, dans Ontario. En Saskatchewan l'augmentation a été de ·36 à 1·95; dans le Yukon et les Territoires du Nord-Ouest, la diminution a été considérable.

Toutes les autres matières du tableau de la population sont en voie de compilation mécanique, par ce qu'on appelle le système des cartes, et on a déjà transporté des feuilles originales sur les cartes, les entrées faites pour 5,350,000 personnes. Quand ce travail sera complété, c'est-à-dire vers le milieu de l'année présente, les diverses statistiques concernant l'âge, l'origine, la naissance, l'immigration, la religion, les occupations, l'instruction, la langue parlée, l'assistance scolaire, les salaires gagnés, etc., seront rapidement assemblées par des machines électriques, et tenues prêtes pour l'impression.

Les listes de l'agriculture et des manufactures sont également en bonne voie de progrès, et l'on espère que l'un de ces rapports, sinon les deux, sera publié avant la fin de l'année fiscale.

J'ai l'honneur d'être, Monsieur,

Votre obéissant serviteur,

ARCHIBALD BLUE,

Chef du Bureau.

Note A. In the first column of this table the initials T. and R. stand for Township and Range, the townships being numbered northward from the international boundary and the ranges eastward or westward according as they lie east or west of the principal meridian. Ranges east of Winnipeg are denoted by the initials Me and those west of it by Mw. Parishes in Manitoba are denoted by the initial p. following. The initial c. following the name of a place anywhere in Canada denotes a city, t. a town, and v. a village. The initials I.R. denote Indian Reserve. Headings of pages alternate in English and French.

Note B. The totals of areas for Canada and the Provinces and Territories are as measured by a planimeter on the map, and embrace land and water; while those for districts are the totals of their respective subdistricts, excepting as may be indicated by footnotes where large areas are unsurveyed and unoccupied, and are land areas only.

[1]By map measurement. [2]Total land area. [3]Included in Calgary city.

Note A. Dans la première colonne de ce tableau les lettres initiales T. et R. representent le Canton et le Rang, les cantons étant numérotés vers le nord en partant de la frontière internationale, et les rangs vers l'est ou l'ouest selon qu'ils sont situés à l'est ou à l'ouest du principal méridien. Les rangs situés à l'est de Winnipeg sont designés par les initiales Me et ceux qui sont situés à l'ouest par Mo. Les paroisses de Manitoba sont designées par la lettre p. à la suite. L'initiale c. à la suite d'un nom de lieu, n'importe où au Canada, signifie une cité, v. une ville et vl. un village. Les initiales R.I. désignent les Reserves Indiennes. Les en-têtes des pages alternent en anglais et en français.

Note B. Les totaux des superficies pour le Canada et les provinces et territoires sont tels que mesurés par un planimètre sur la carte et embrassent la terre et l'eau; tandis que ceux des districts représentent les totaux de leurs sous-districts respectifs, excepté là où les notes au bas des pages indiquent que les superficies sont ni arpentées ni occupées, et ne sont que des superficies de terre seulement.
